

# Code Day Assignment

## *Test Engineer*

We are glad you are here! Relax and have fun. We are sure you will do great. Here is the plan for your code day.

You are going to serve as a product owner/manager and test engineer for a time tracker application. You will receive a spec and a working deployment-candidate application for testing.

### **Outline for the day:**

#### **Getting started:**

Test the test suite on machine to make sure it works. Get acclimated with the requirements and the application itself. Track issues in GitHub as you find them.

*(Plan about 1 hour)*

#### **Test Planning:**

Write a prioritized list of things to test and do exploratory testing.

*(Plan about 1 1/2 hours)*

### **Lunch: 11:30-12:30**

#### **Pairing:**

Pair with a Test Engineer to go through application. *(Plan about 1 1/2 hours)*

Pair with a Test Engineer to write tests. *(Plan about 1 hour)*

#### **Preparation & Issues:**

Work on a final presentation to present to the group that includes your findings, issues and tests you've written. *(Plan about 1 hour)*

#### **Presentation:**

*(Plan about 1 hour)*
